MONOCHROME VIDEO MONITORS**PVM-411****PVM-91****PVM-411 Quadruple 4" Monochrome Monitor**

Four independently controlled 4" screen (measured diagonally) monochrome monitors in a single rackmount unit. Fits EIA standard 19" rack. Individual unit shielding minimizes magnetic crosstalk distortion. Spot-killer circuitry prevents phosphor burns when bright images remain on-screen for extended periods. Loop-through capability enhances use in multiple location production and surveillance applications. Individual front-mounted contrast, brightness, V-hold and H-hold controls. Weight: 35 lbs. 4 oz. Dimensions: 5-1/4"H x 19"W x 12-1/2"D.

PVM-411 Quadruple 4" Monochrome Monitor**\$1275.00****PVM-122****PVM-122 12" High Resolution Monochrome Video Monitor**

- 1000 lines of horizontal resolution at center
- Selectable scanning systems: Normal/Underscan
- DC clamp switch provides a stable reference for black level
- External sync input
- Selectable A/B line inputs with front switch
- Loop-through BNC connectors for Line, A/B and Sync
- Built-in speaker for audio monitoring
- Tally lamp
- Weight: 21 lbs. 11 oz.
- Dimensions: 12-3/16"H x 12"W x 12-3/16"D

\$450.00**PVM-91****9" High Resolution Monochrome Video Monitor**

A high resolution black and white monitor whose picture precision makes it an ideal unit for use as a computer display, a calibration device for color video cameras, CCTV applications and a studio control room monitor.

- 800 lines of horizontal resolution at center
- Selectable scanning systems: Normal/Underscan

- DC clamp switch provides a stable reference for the black level
- Accepts an external sync
- Loop-through BNC connectors for video and sync
- Can be installed/rackmounted as a dual video with the MB-500 optional mounting bracket monitor
- Can be installed with a waveform monitor or a vectorscope by using an MB-501 optional mounting bracket
- Weight: 12 lbs., 12 oz.
- Dimensions: 8-3/4"H x 9"W x 10"D

\$345.00

PELCO**MODEL CM-14
LIGHT DUTY
CAMERA MOUNT**

- * DECORATOR STYLING
- * BALL/SWIVEL ADJUSTABLE HEAD
- * SCREW DRIVER ADJUSTMENT
- * STURDY INJECTION MOLDED PLASTIC
- * LOW COST

Designed to tastefully blend with interior decors of offices, banks or similar installations, the **CM-14** has been structurally engineered for strength and rigidity.

Manufactured of sturdy Rynite plastic and injection molded for low cost efficiency, the **CM-14** is capable of supporting camera/lens combinations up to 12 lbs. when securely mounted.

An easily adjustable ball swivel head allows for unlimited pan rotation and 90° tilt down angle. Adjustments are made with a screwdriver which facilitates a tamper resistant installation.

Approved For Release 2000/08/08 : CIA-RDP96-00789R002100140002-2

PANASONIC TIME/DATE GENERATOR MODEL WJ-810

The Panasonic WJ-810 time/date generator superimposes the time and date onto any composite video signal. In addition to the time and date signal, it also produces 99-hour stopwatch signals. This quality time/date generator is highly recommended for use with time lapse video tape recorders, and is ideal for various industrial, scientific and security applications.

The WJ-810 produces adjustable white to black characters, along with independently adjustable black to white edge outlines. Front-panel controls vary the character brightness, and adjust the character size, which may be varied anywhere from 23 up to 34 TV scan lines in height. These conveniently located switches also produce either a horizontal or vertical arrangement of the time and date, and when used with sequential switchers (models WJ-521/523/525/527/512), the WJ-810 will display from 1 up to 18 camera input numbers. The month display can be shown either in English

or numerically, and there is the option to display character type in either a normal or slant 7-segment configuration. Front-panel controls will position the display horizontally or vertically within 80% of the picture area.

The time/date generator is accurate to within 15 seconds in a month, due to an internal quartz-crystal. An internal battery (not included) functions as a backup power source for up to 12 hours, to prevent time error in the event of a short term power failure. A video signal will still appear during a power failure thanks to the pass through type video output feature of the WJ-810. If a battery is being utilized as the power source, there is a battery warning indicator which displays the symbol "BATT" on the monitor screen when the battery charge is too low, or dead.

The time and date can be reset by front-mounted controls, and an internal full automatic calendar circuit changes

the day, month and year automatically, and even makes allowances for leap years.

When used with the WJ-512 sequential switcher, which has an alarm function, the time/date generator aids the effectiveness of any security system by showing a display indicating the number of times the alarm sensor was activated. It also contains a stopwatch function with a 99-hour limit, and displays this time in hours, minutes, seconds and hundredths of a second. Handy front-mounted controls will start, stop and reset this stopwatch feature, which is worthy of applications involving medical, scientific or technical operations where accurate timing is essential. The WJ-810 time/date generator is compact, and takes up only 1-3/4" of standard rack space. It is part of the complete and versatile Panasonic line of closed circuit television equipment, including cameras, monitors and video tape recorders.

QUALITY ENGINEERING FEATURES

1. Superimposes time and date onto any composite video signal.
2. Stopwatch function with 99-hour limit displays time in hours, minutes, seconds and hundredths of a second, with front-mounted start, stop and reset controls.
3. Highly recommended for use with time lapse video tape recorders, such as the Panasonic NV-8030.
4. Variable independent adjustment of white to black character brightness and black to white edge brightness.
5. Adjustable control of character size anywhere from 23 up to 34 TV scan lines high.
6. Time and date can be displayed either in a horizontal or vertical stacked position.
7. Display position adjustable within 80% of the picture area.
8. Month display can be shown either in English or numerically.
9. Character type can be displayed in either a normal or slant 7-segment configuration.
10. When used with sequential switchers (models WJ-521/523/525/527/512), also displays up to a maximum of 18 camera input numbers.
11. Internal quartz-crystal time accuracy of 15 seconds in one month.
12. Internal batteries (not included) are designed to prevent time error due to short term power failure, for up to 12 hours.
13. Pass through type video output produces a video signal even in the event of a power failure.
14. When used with WJ-512 sequential switcher with alarm function, the WJ-810 displays number of times alarm was activated, and what camera was involved, on monitor screen.
15. Battery warning indicator ("BATT") displayed on monitor screen in case of low or dead battery.
16. Full automatic calendar with leap year allowance.
17. Front-panel controls reset time and date.
18. Rack mountable.

The above cable hook-up allows VCR-TV functions except for viewing one channel while recording another channel.

The above cable hook-up allows VCR-TV functions, including viewing one channel while recording another channel, but it requires two cable TV converter boxes and one cable switch.

Specifications

Power Sources: 120V AC, 50/60Hz
Power Consumption: Approx. 27 watts
Television System: EIA Standard (525 lines, 60 fields)
 NTSC color signal

Video Recording System: 2 rotary heads, helical scanning system
 Luminance; FM azimuth recording
 Color signal; converted subcarrier phase shift recording

Audio Track: 1 track

Tape Format: Tape width $\frac{1}{2}$ inch (12.7mm),
 high density tape

Tape Speed: SP; $1\frac{5}{16}$ i.p.s. (33.35mm/s),
 LP; $2\frac{1}{32}$ i.p.s. (16.67mm/s),
 SLP; $7\frac{1}{16}$ i.p.s. (11.12mm/s)

Record/Playback Time: 360 min. with NV-T120 used in SLP mode
 FF/REW Time: Less than 5 min. with NV-T120

Input Level:
Video; TV Monitor connector (8-pin connector)
 1.0Vp-p, 75Ω unbalanced
 VIDEO IN (BNC), 1.0Vp-p, 75Ω unbalanced
Audio; TV Monitor connector (8-pin connector)
 -20dB, 47kΩ unbalanced
 AUDIO IN (RCA), -10dB, 47kΩ unbalanced
TV Tuners; VHF input CH2 ~ CH13, cable channels
 "A-2, A-1, A ~ I, J ~ W"
 UHF input CH14 ~ CH83, 300Ω

Output Level:
Video; TV Monitor (8-pin connector), 1.0Vp-p, 75Ω
 VIDEO OUT (BNC), 1.0Vp-p, 75Ω
Audio; TV Monitor (8-pin connector), 0dB, 600Ω
 AUDIO OUT (RCA), -8dB, 600Ω unbalanced
RF Modulated; Channel 3 or 4, 66.5dBμ (open voltage),
 75Ω unbalanced (M2)

Camera Remote: (M2)

Video Horizontal Resolution: Color: more than 240 lines
 (on monoscope test pattern)

Audio Frequency Response: SP; 50Hz ~ 10kHz,
 LP; 50Hz ~ 8kHz, SLP; 50Hz ~ 6kHz

Signal-to-Noise Ratio: Video: better than 45dB (Color, SP mode)
 (Rohde & Schwarz noise meter)
 Audio: better than 43dB (SP mode)

Operating Temperature: 41°F ~ 104°F (5°C ~ 40°C)
Operating Humidity: 35% ~ 80%
Weight: 18.7 lbs (8.5kg)

Dimensions (W × H × D): $16\frac{1}{16}" \times 4\frac{9}{16}" \times 14\frac{9}{16}"$ (430 × 115 × 369mm)

Accessories Supplied: 1 pc. VHF matching box 75 Ω-300 Ω
 transformer (VSQ 0015-1)
 1 pc. Coaxial cable with one-touch type F
 connector (VJA 0147-1)
 1 pc. 300 Ω-75 Ω transformer (VFA 0010)
 1 pc. F connector (VSQ 0051-1)
 1 pc. Twin-Lead Cable (VJA 0102A)
 1 pc. Wired Remote Controller (VSQ 0265)
 1 pc. Channel Film (VGQ 0253 and 0693)
 1 pc. Dust Cover (VFB 0041)

Warning: One Federal Court has held that recording copyrighted TV programs is infringement. Such programs should not be recorded.
